DEPARTMENT

Child Pornography as a Term

- Words shape attitudes, influence public opinion, and drive social change.
- The term “child pornography” is still the legal term used in the U.S. code, but child sexual abuse material (CSAM) is a more accurate term as this is evidence of actual child sexual abuse.
- Child Sexual Abuse Material (CSAM) describes the representation (photos/videos) of sexually explicit conduct involving a minor.
- This term better depicts the reality of this horrendous crime as opposed to the legal term “child pornography.”
- Children exploited in this way are not capable of giving consent, and are ALWAYS re-victimized each time the content is shared, sold, traded and when those who view it and fantasize about it masturbate to it.

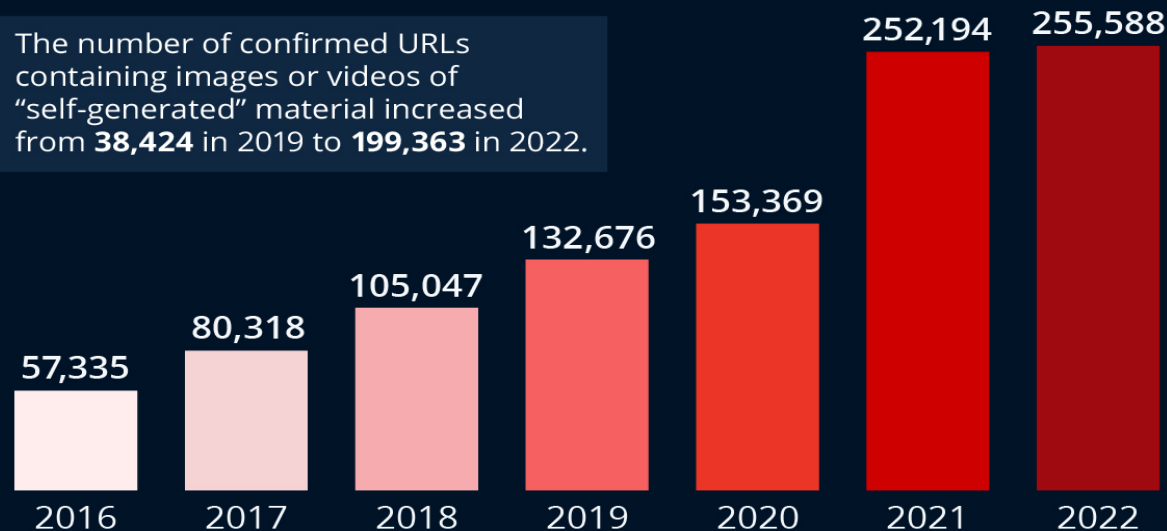

**Call it what it is.
#CSAMnotCP**

While Pornography Is Insidious and Prevalent – CSAM is Growing at a Rampant Rate

Online Child Pornography Skyrockets

Total number of URLs confirmed as containing child sexual abuse imagery worldwide, by year*

The number of confirmed URLs containing images or videos of “self-generated” material increased from **38,424** in 2019 to **199,363** in 2022.

* Includes links to the imagery or advertising it. Each URL could contain one, tens, hundreds or even thousands of individual child sexual abuse images or videos.

Source: Internet Watch Foundation

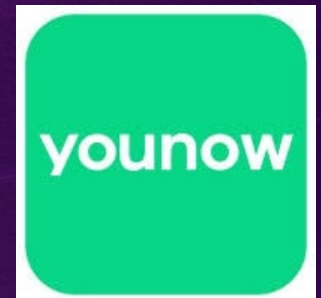

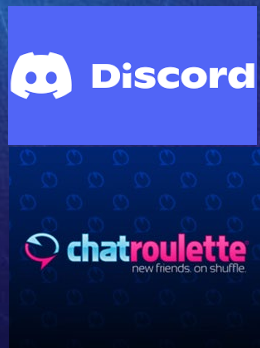

Who is Responsible for CSAM

- Sadly, the majority of CSAM is created by people with legitimate access to the child like parents, uncles, neighbors, and family friends
- Self-generated child sexual abuse material (SG-CSAM)
- CSAM produced without any clear offender present in or to take the images is considered SG-CSAM
- These images or videos result from multiple sources, such as:
 - A romantic exchange with a friend from school
 - A child being groomed and extorted to take explicit images of themselves at the demand of an offender online
 - A screen capture of a live stream
- US Produces more CSAM and Hosts more CSAM Sites than any other country

The Percentage of Self-Generated CSAM is Skyrocketing

- When I first started ICAC and Child Sex Abuse cases in the 90's there was very little self-generated CSAM seen
- As the years went by larger and larger amounts of Self-Generated CSAM became prevalent
 - 8 Year old chatting with 29 Year old in Cary
 - 7 year old first computer- between Christmas and February hundreds of photos
 - 12 year old (boy chatting with other boys)

Direct Correlation Between Human Trafficking of Children Human Trafficking and CSAM

FOX 26 BREAKING NEWS **10 PEOPLE DETAINED IN RAID ON BAYTOWN AREA HOME** 5:00 PM 82°

10 suspected illegal migrants busted for child pornography in Texas

A group of 10 suspected illegal migrants from Asia and Guatemala have been busted in Texas for allegedly possessing child pornography, according to police. Credit - Fox 26

A group of 10 suspected illegal migrants from Asia and Guatemala have been arrested for allegedly possessing child pornography at [a Texas](#) house, police say, while Homeland Security tells Fox News Digital that the premises was being used as a "stash house for human smuggling activities."

The 10 suspects were taken into custody Thursday at 5118 Dripping Springs in Chambers County, about 33 miles east of Downtown Houston, according to the [Chambers County Sheriff's Office](#).

Law enforcement stated that they had to force entry because the occupants refused to let the officers in during the 9 a.m. search.

COUNTRIES WORLDWIDE

750,000+

CASES OF ABUSE PREVENTED

WRITE TO YOUR OFFICIAL

2.5 Million

The most shared child abuse file has been seen linked with over 2.5 million unique IP addresses.

50 - 150

Predators typically have between 50 and 150 victims over the course of their lifetimes.

72.5 Million

Since inception, CRC has identified 72.5 million unique IP addresses worldwide sharing and downloading sexually explicit images and videos of children.

7 - 13

Children are most vulnerable to child sexual abuse between the ages of 7 and 13.

1 in 5

As many as 1 in 5 girls and 1 in 20 boys will experience some form of sexual abuse before age 18.

90 %

90% of children who suffered sexual abuse were violated by someone known to the family.

With the amplification of the internet and digital technologies, the circulation of child sexual abuse material – sometimes inaccurately referred to as “child pornography” – has exploded worldwide.

Child Sexual Exploitation Material

- It is a GLOBAL problem.
- Since 2004 there have been over 9 billion child sex abuse media transmissions on the Internet Worldwide.
- 18,000 Unique IP addresses are identified every hour participating in trade of Child Sex Abuse Material on the Internet.
- 27042 unique computer serial numbers in the US.
- 838 unique computer serial numbers in NC alone in recent history.

Child Rescue Coalition
Child Protection System

Child Sexual Exploitation Material

- Perspective to the previous data sets
 - Offender traffic is currently only captured on a small portion of the Internet (5 out of 10 File Sharing Networks).
 - Many other areas exist that allow offenders to share child exploitation material in closed forums, encrypted on-line file vaults and untraceable networks such as Freenet and Tor.
 - The real numbers are significantly higher than what we are able to currently capture.

CSAM and Human Trafficking Links

- "CSAM plays a unique role in Sex Trafficking." *
- "It can be a form of sex trafficking and a major factor of demand by creating and fueling demand for itself." *
- "Nearly all buyers of commercial sex acts are also pornography users." *
- "It often leads users to seek to act out what they have viewed." *
- "Every person who provides a sexually abusive image to someone else is saying that it is OK to exploit children and sex trafficking victims." *
- It "enables, and emboldens others." *
- It validates others in their sexual abuse preferences with SHARED FANTASIES

* Busnik, R. N. (2014). Blurred lines or bright line? Addressing the demand for sex trafficking under California law. *Pepperdine Law Review*, 42(2), 333-376.

CSAM and Its Effect on Offending Butner Study

“This study compared two groups of child pornography offenders participating in a voluntary treatment program: men whose known sexual offense history at the time of judicial sentencing involved the possession, receipt, or distribution of child abuse images, but did not include any “hands-on” sexual abuse; and men convicted of similar offenses who had documented histories of hands-on sexual offending against at least one child victim.

CSAM and Its Effect on Offending

Butner Study

“The goal was to determine whether the former group of offenders were “merely” collectors of child pornography at little risk for engaging in hands-on sexual offenses, or if they were contact sex offenders whose criminal sexual behavior involving children, with the exception of Internet crimes, went undetected. Our findings show that the Internet offenders in our sample were significantly more likely than not to have sexually abused a child via a hands-on act. They also indicate that the offenders who abused children were likely to have offended against multiple victims, and that the incidence of “crossover” by gender and age is high.”

WNCN.COM

Cary man sentenced to 20 years after 3,400 child porn images found

Authorities searched Andrew Stephen Lazetera's Cary home on Halloween of last year, said...

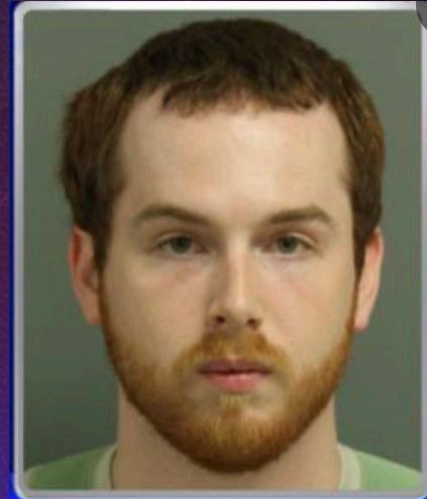

Initial Steps on Case – FTP Access and Downloads

- The first folder I selected was the folder “set-babyfuck.”
- Your Affiant noted 29 files in that folder and viewed and exported those files.
- Of those 29 files all 29 were extreme CSAM photos of babies.
 - Descriptions omitted
 - You DON'T want to know

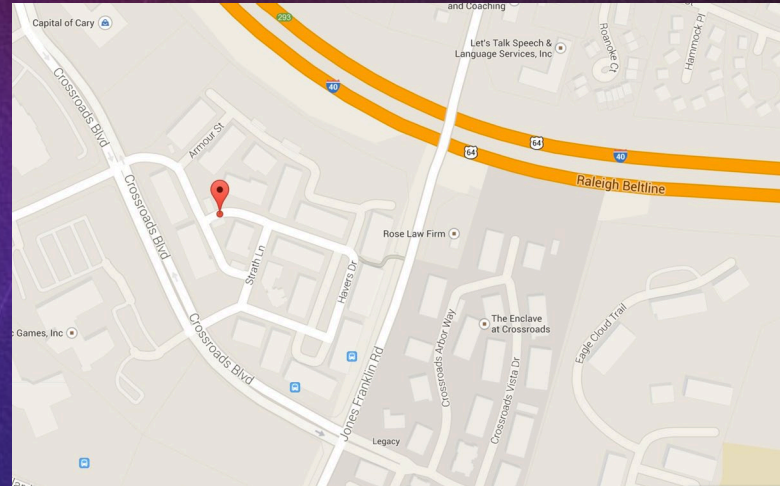

Initial Steps on Case – FTP Access and Downloads

- I literally downloaded hundreds of CSAM
 - Dogs Cats and Animals with Babies
 - Baby Rape
 - Preteens
 - Everything imaginable and UNIMAGINABLE

Search Warrant

When I Finished Computer Forensics

Found close to a hundred files of a 15 year old female and sexual acts

Masturbation

Etc

Objects inserted into her genitals

Found files of that 15 year old girl, nude, drunk or passed out

There was a baby's leg and foot in the shots

The baby's foot was inserted into the female's genitals

Geo Data in the MetaData to me to Andrew Lazetera's old address in Vermont and Next Door to a 15 year old girls residence

The 15 year old girl was his girl-friend (underage)

the baby was a child she (the 15 year old babysat)

Child Sexual Exploitation Material

- A sexual abuse image or video of a child is a permanent record of a horrific act committed against the most vulnerable of victims.
- Individuals, in my experience, take PRIDE in possessing and trading this material on the Internet.
- **In nearly all interrogations and interviews of suspects in well over 20 years in this area, suspects admit to “fantasizing” and masturbation while fantasizing about the child they are viewing in CSAM**
- **Most admit to starting this fantasy early in their teens**

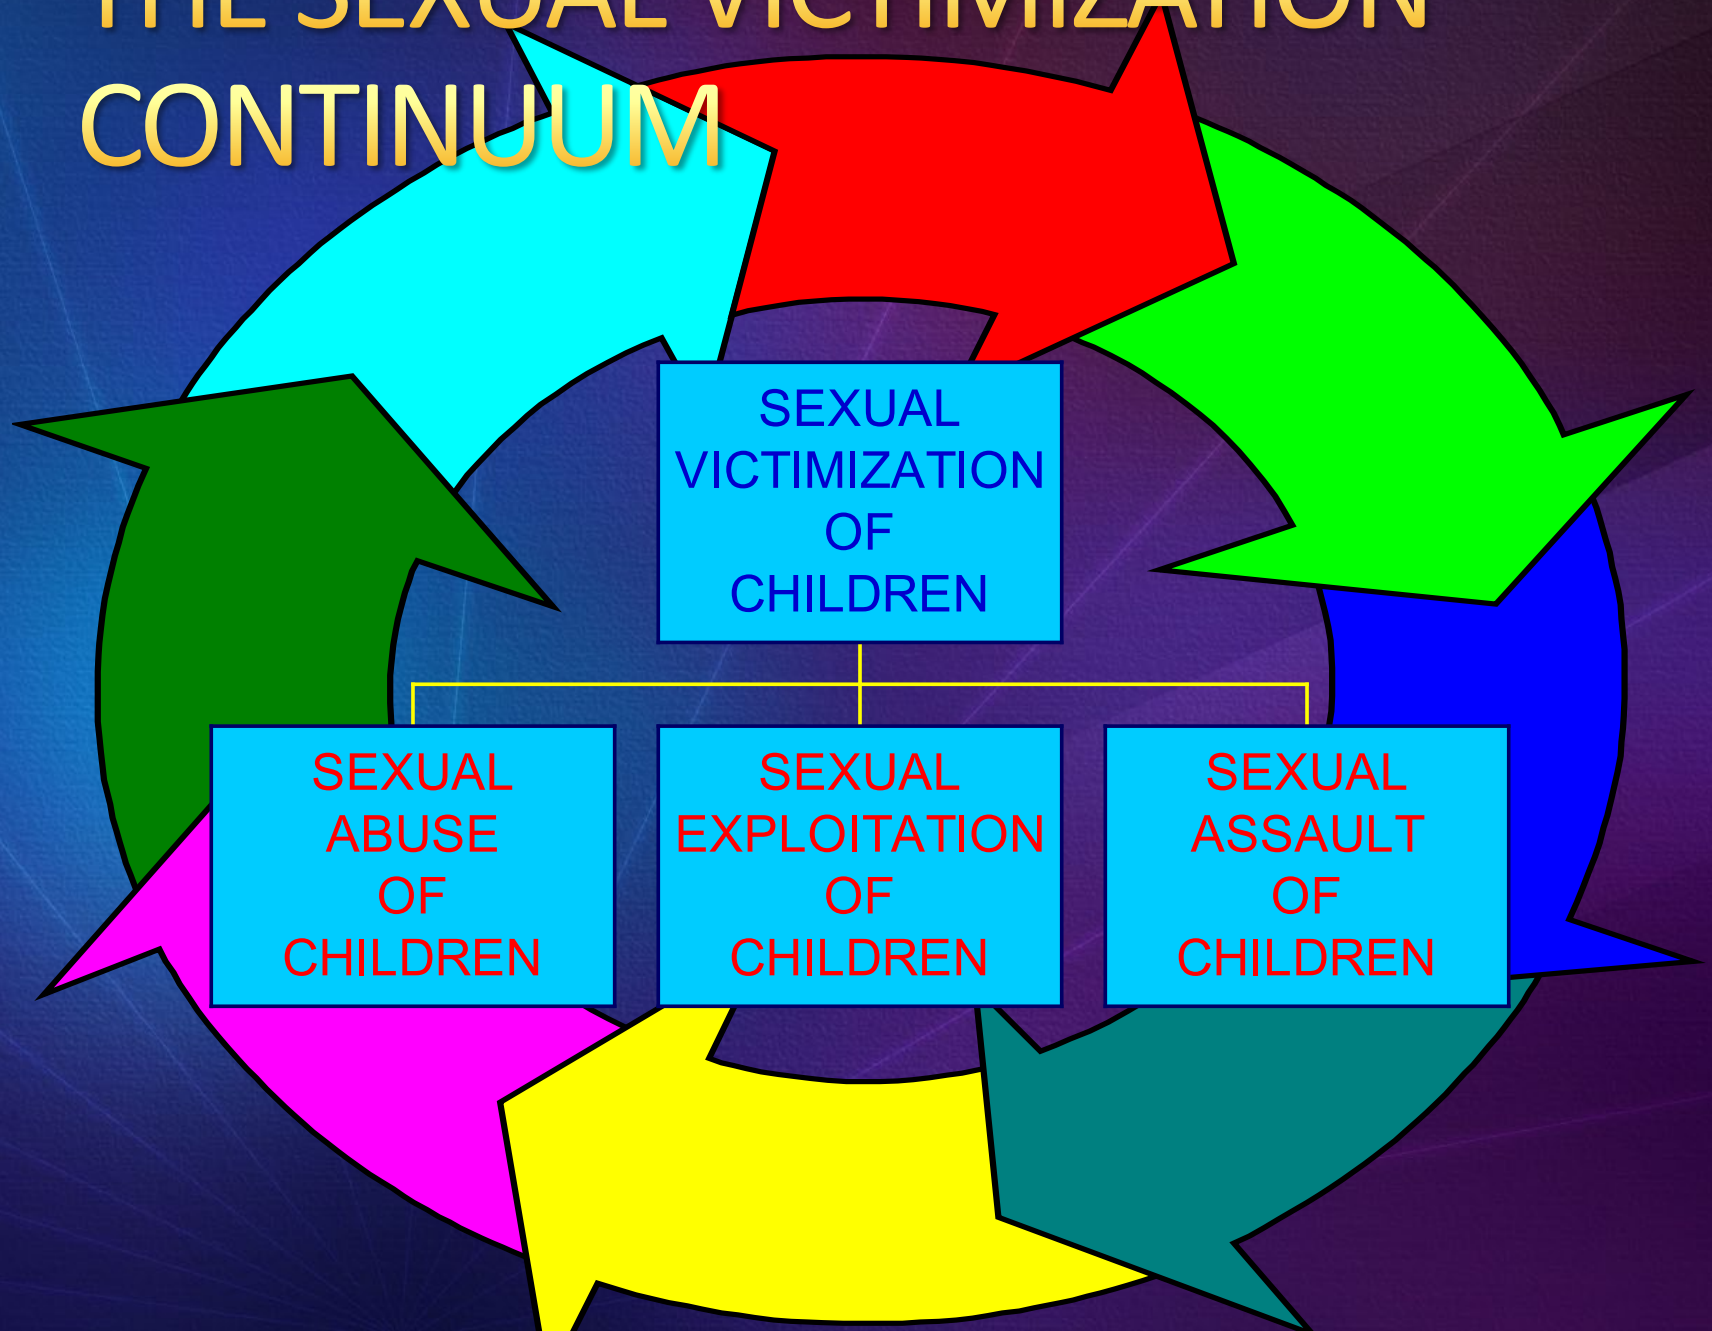

Possessor or Abuser?

Possessor or Abuser?

- Did you ever know anyone who collected baseball cards?
- If so and if you had a conversation with that person how likely would they be to purchase a ticket and go to a baseball game if given the chance.
- Contrast that to collectors of CSAM.
- What is the likelihood that a CSAM collector would have sex with a child if given a chance.

Cognitive Distortion AKA Mixed Up Thinking

- Denial - Mere affection or merely a desire
- Minimize
- Project - “If my marriage...”
- Rationalize - Children enjoy sex
- Justification/Entitlement-Offender puts his needs/wants above victim’s
- One Group (NAMBLA) – “Sex before eight or it’s too late.”

National Center For Missing and Exploited Children-Cybertipline Reports

Over 99.5%
of the reports received by the
CyberTipline in 2022 regarded
incidents of suspected CSAM.

Cybertipline Reports in NC

When most people hear about CyberTips, they believe these are reports related to the “creepy pedophiles” on the dark web or in the deep, hidden places of the internet.

Unfortunately, this perception is **NOT TRUE!!**

CyberTips in 2023

Cybertipline Reports in NC

What Can Be Done

- Legislation
 - CSAM Scanning via HASH Values and Photo DNA required. (Deplorable APPLE Decision)
 - AI Legislation.
 - Stricter controls on the “Porn” sites requiring age verification.
 - Legislation change on terminology (Recent Alaska change).
 - Human Trafficking and Money Laundering laws.
 - FUNDING
- Greater funding for the Watch Dogs of CSAM and HT.
- Education for youth.
 - Cultural change from the current Internet Porn trends.
 - Healthy relationships topics. “Man Up”
- Support of local organizations and 501c3 groups that serve victims of Trafficking and or sex abuse.
- Speak out to the community – (who wants to hide and pretend it doesn’t exist.)
 - Don’t glorify
 - Don’t tolerate improper lingo (CSAM not Child Pornography).
 - Holding offenders socially and civilly responsible as well as criminally.
 - Teach more about all forms of sex abuse
- Become an AGENT of change!
